

Build your AI tool today.

Day 3 of 5 · no code

Day 3: Build it.

No code. Just your playbook.

Upload a document. Paste some text.

Your brain has three layers.

Knowledge

your playbook

Voice

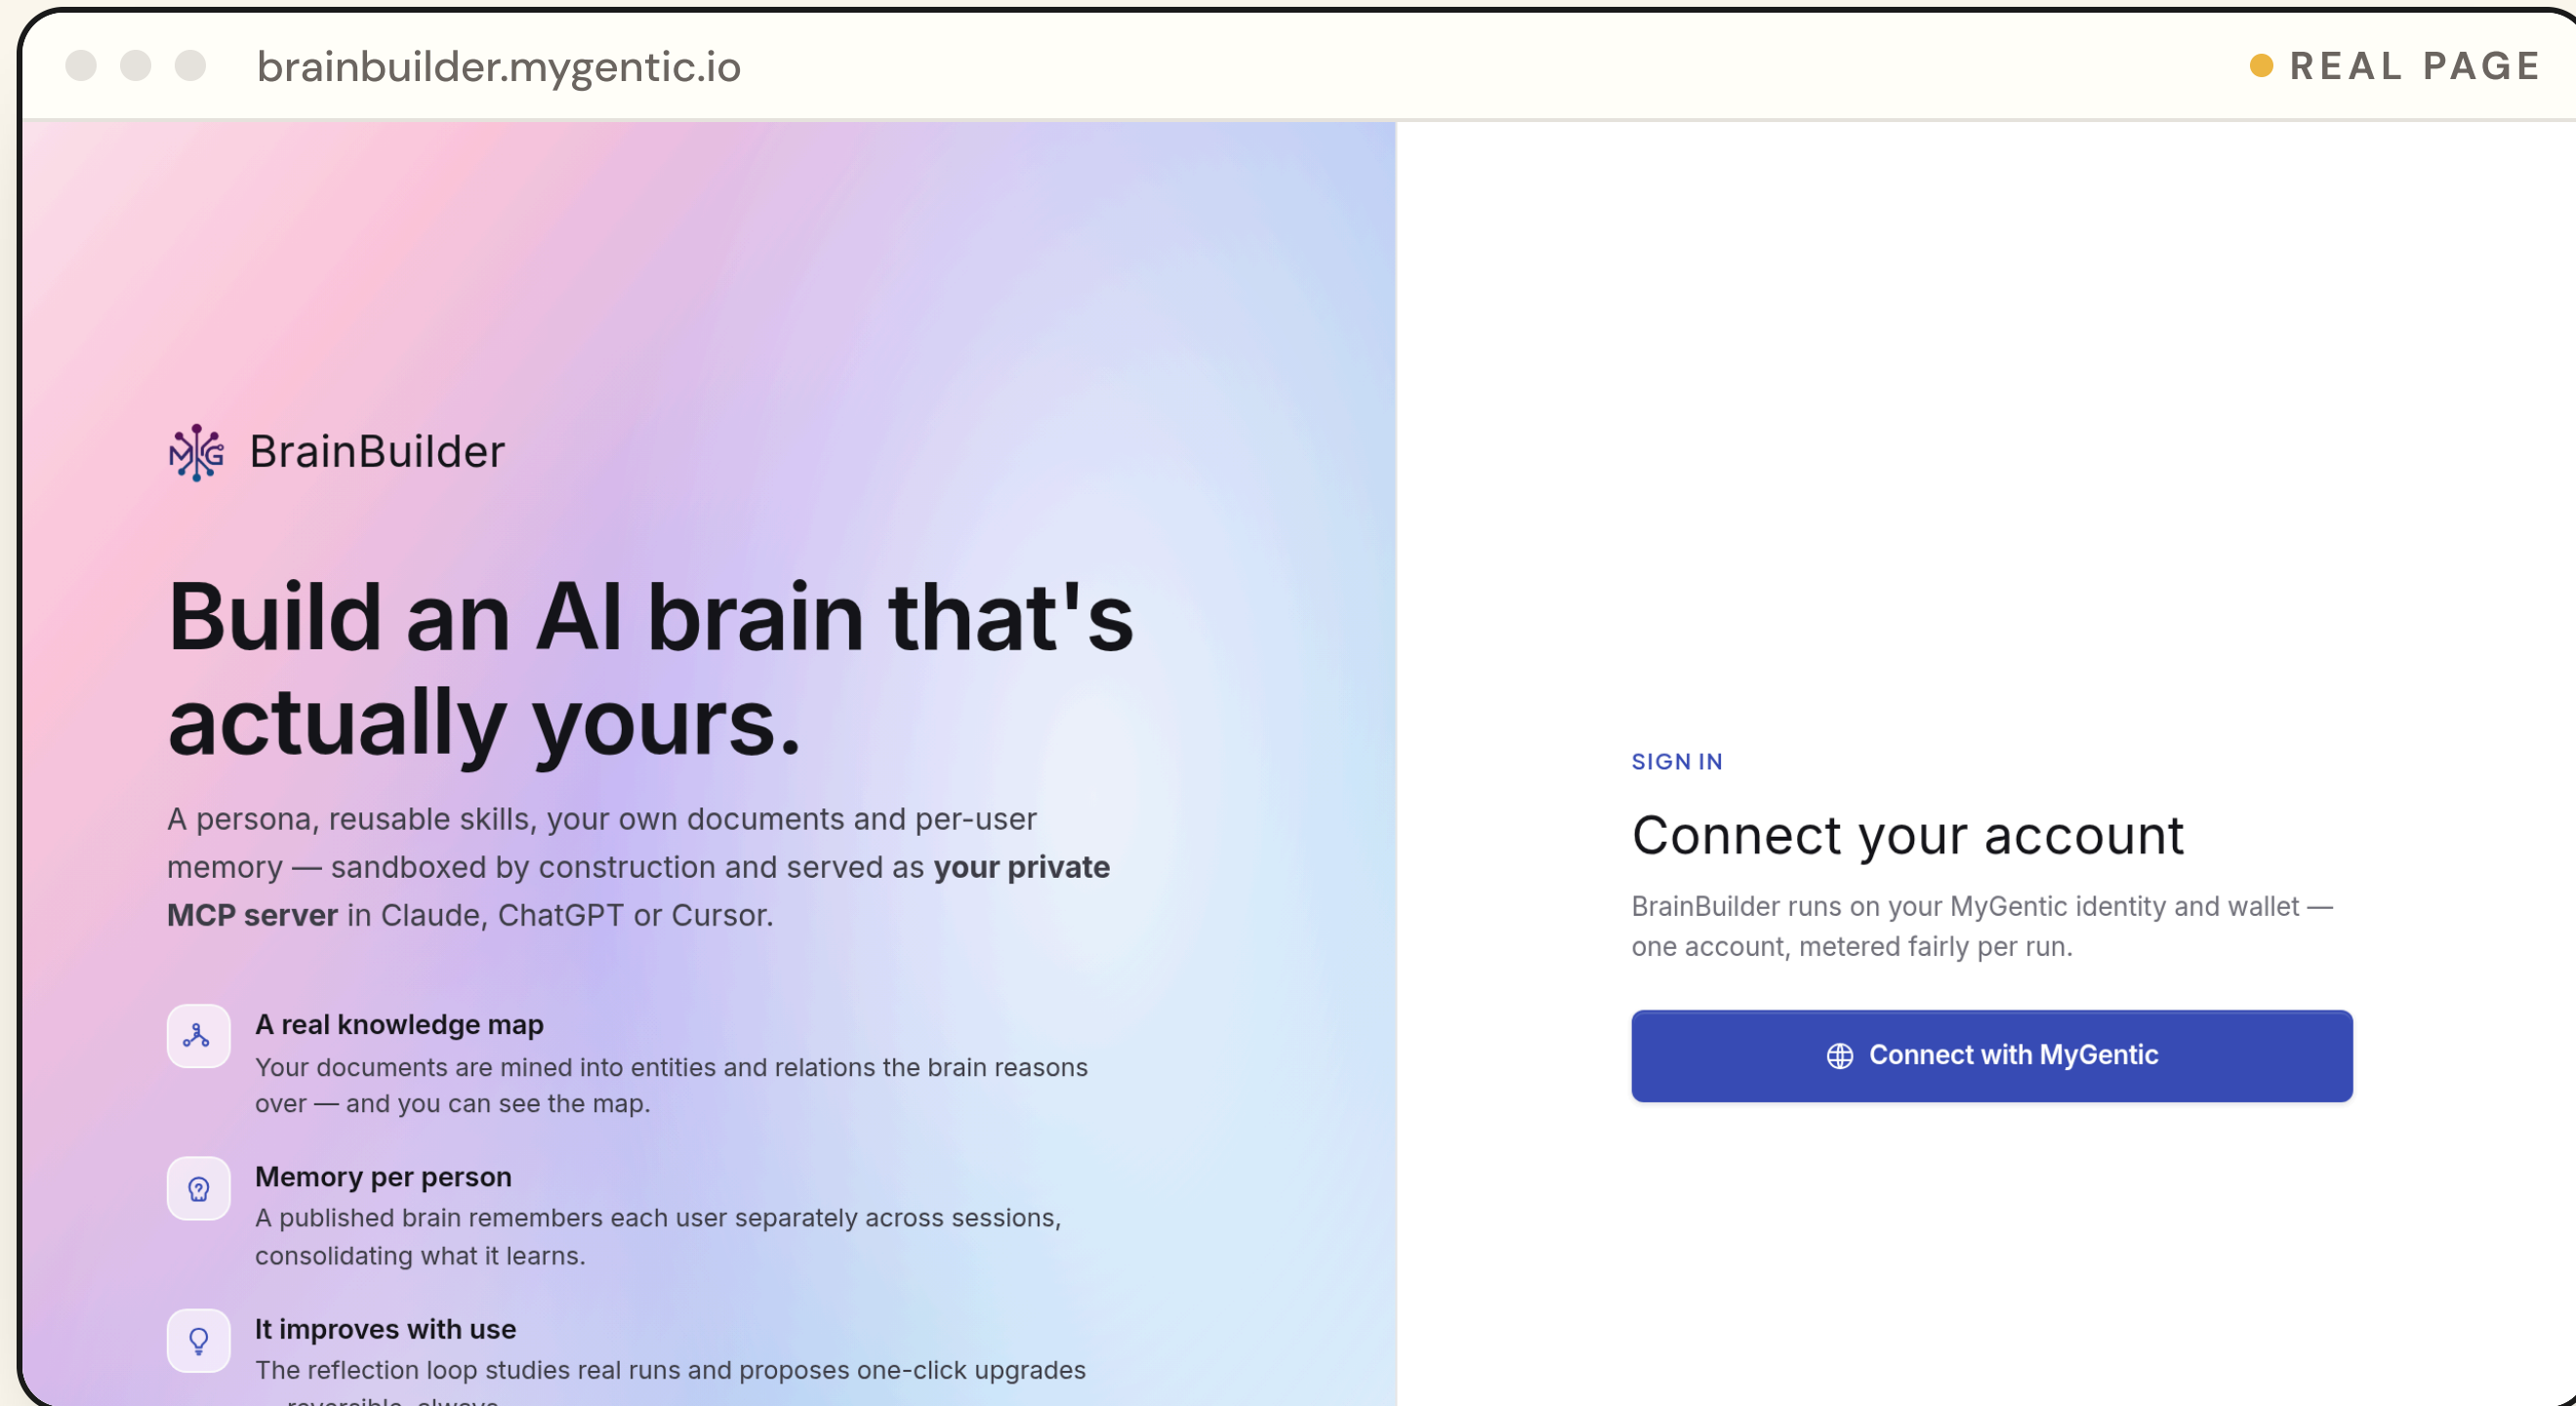

how you talk

Rules

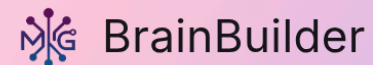

what it never does

Where your tool lives.

● ● ● brainbuilder.mygentic.io

● REAL PAGE

Build an AI brain that's actually yours.

A persona, reusable skills, your own documents and per-user memory — sandboxed by construction and served as **your private MCP server** in Claude, ChatGPT or Cursor.

A real knowledge map

Your documents are mined into entities and relations the brain reasons over — and you can see the map.

Memory per person

A published brain remembers each user separately across sessions, consolidating what it learns.

It improves with use

The reflection loop studies real runs and proposes one-click upgrades
reversible, always

Connect your account

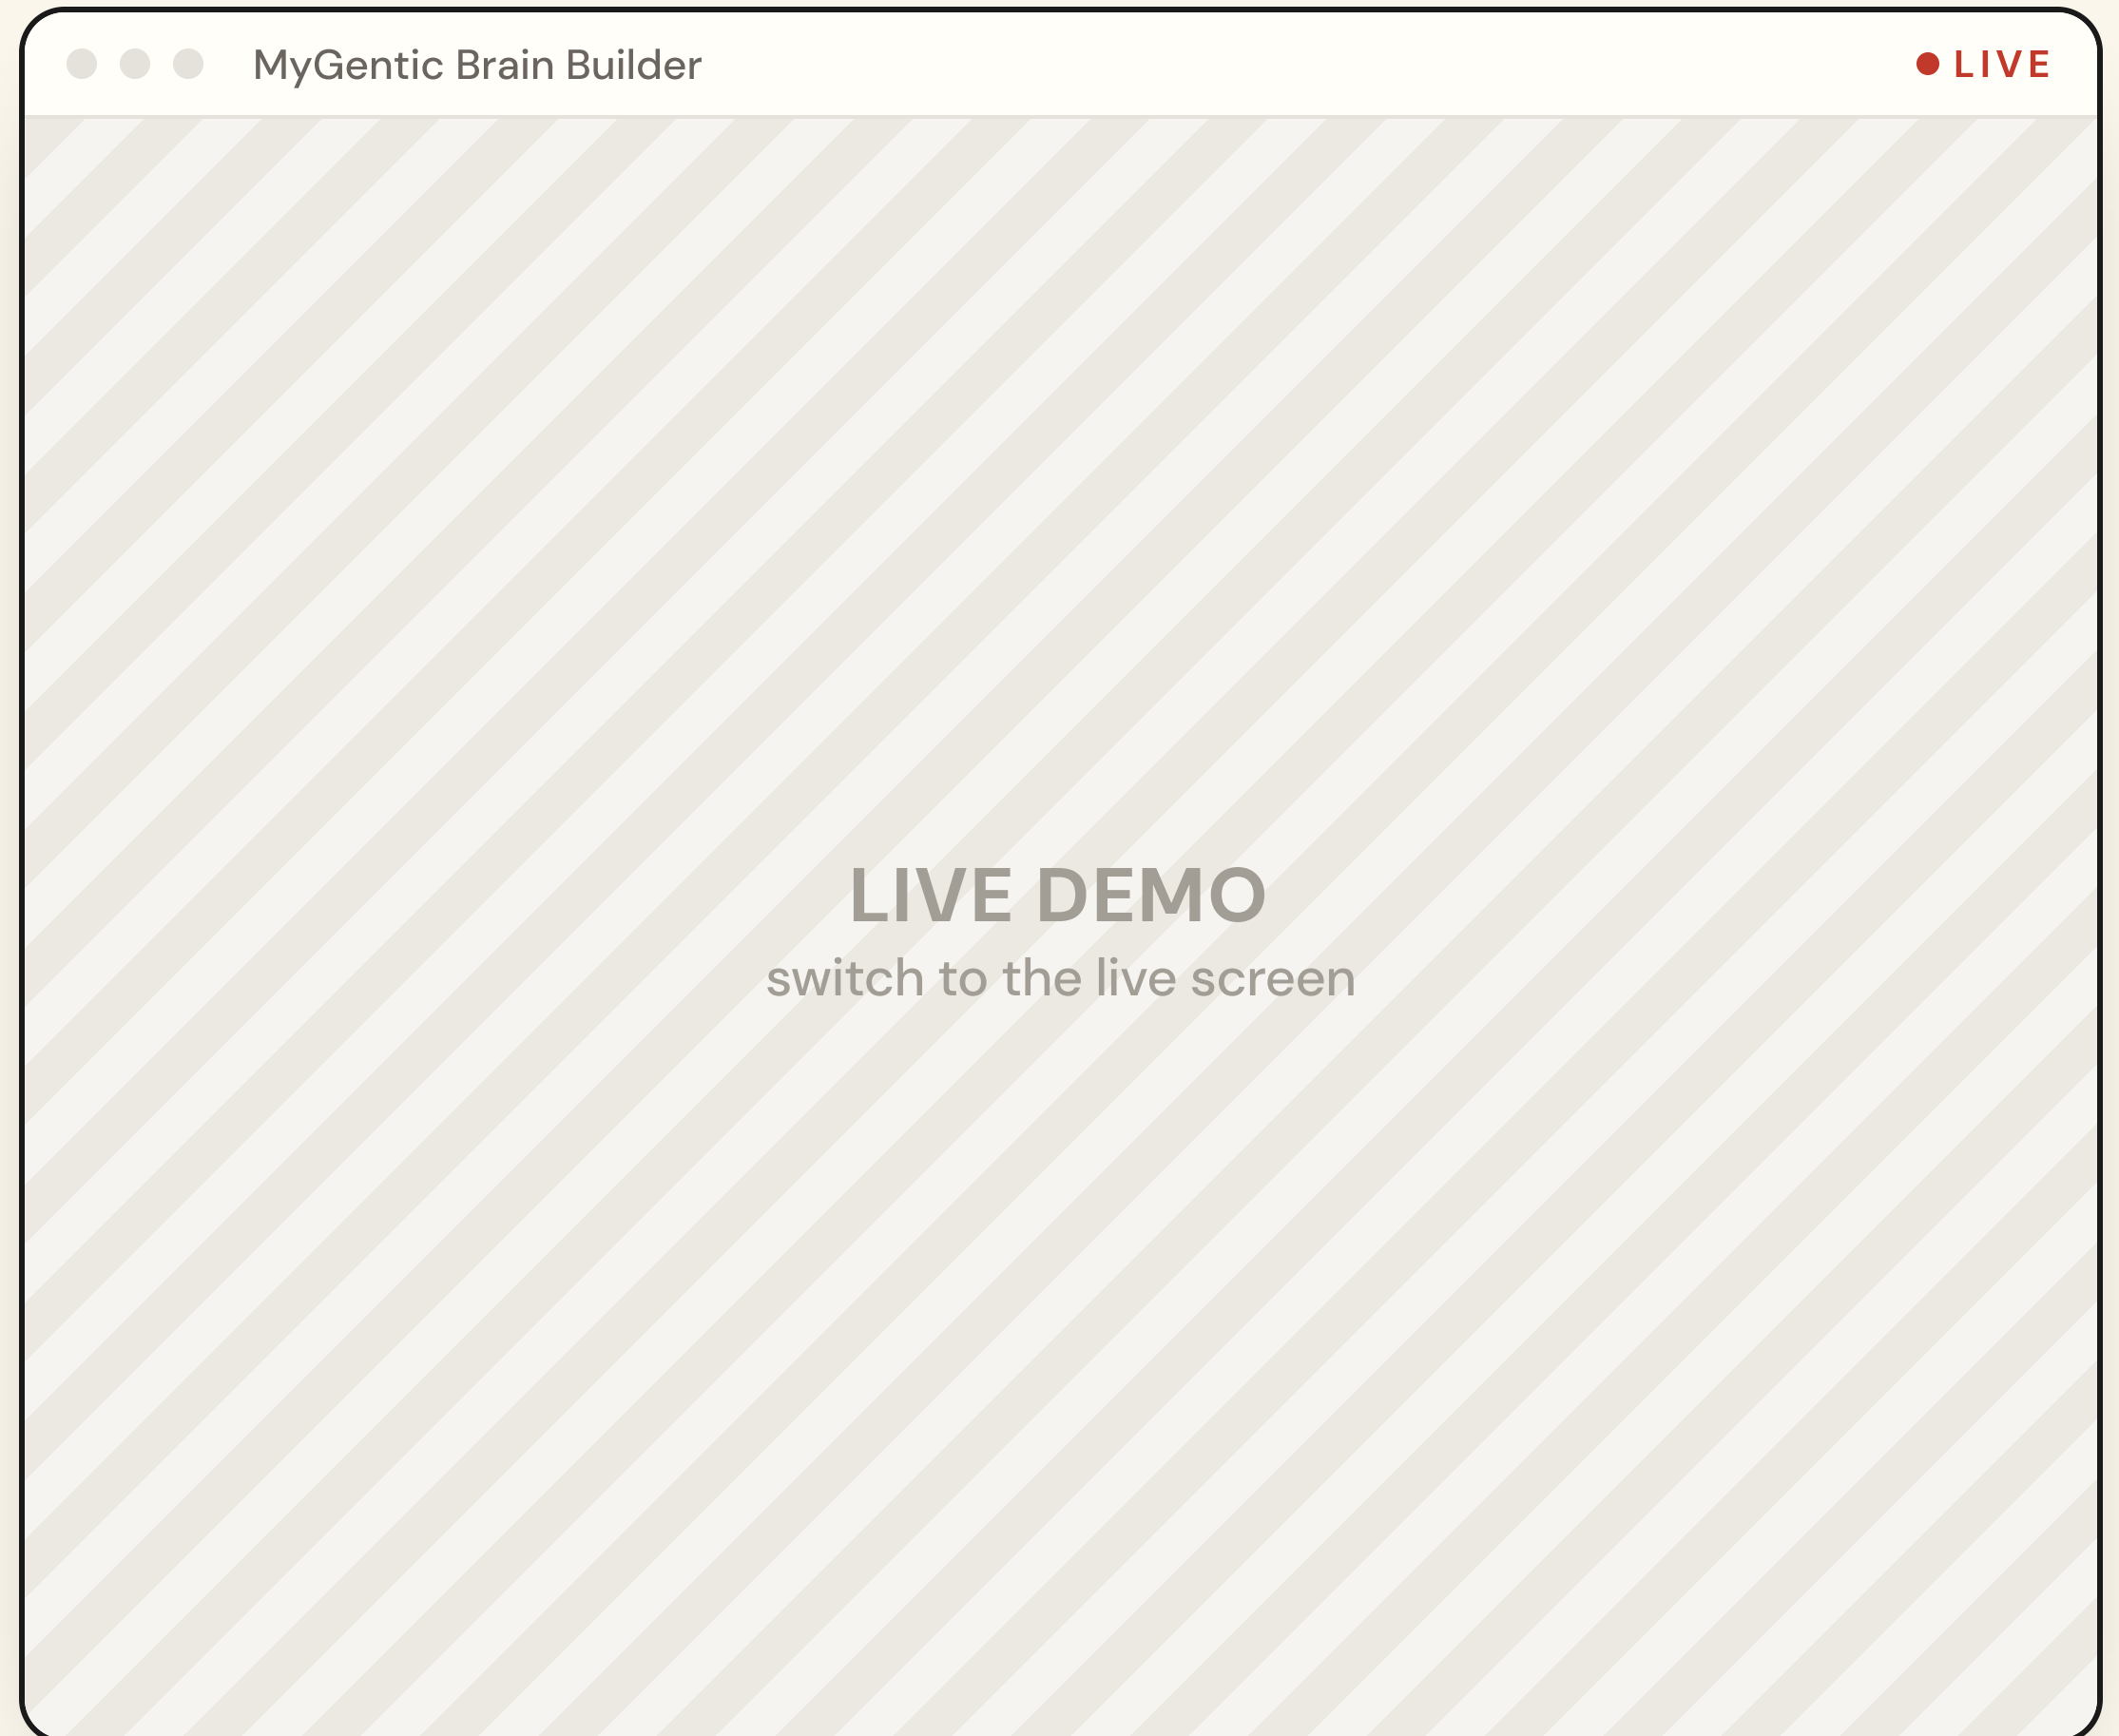

BrainBuilder runs on your MyGentic identity and wallet — one account, metered fairly per run.

 [Connect with MyGentic](#)

Load your playbook.

Hey Brain, set up my expert
brain

- 1 Clean playbook
- 2 Knowledge → upload
- 3 Name your tool

Load your playbook. Name your tool.

Upload

Name

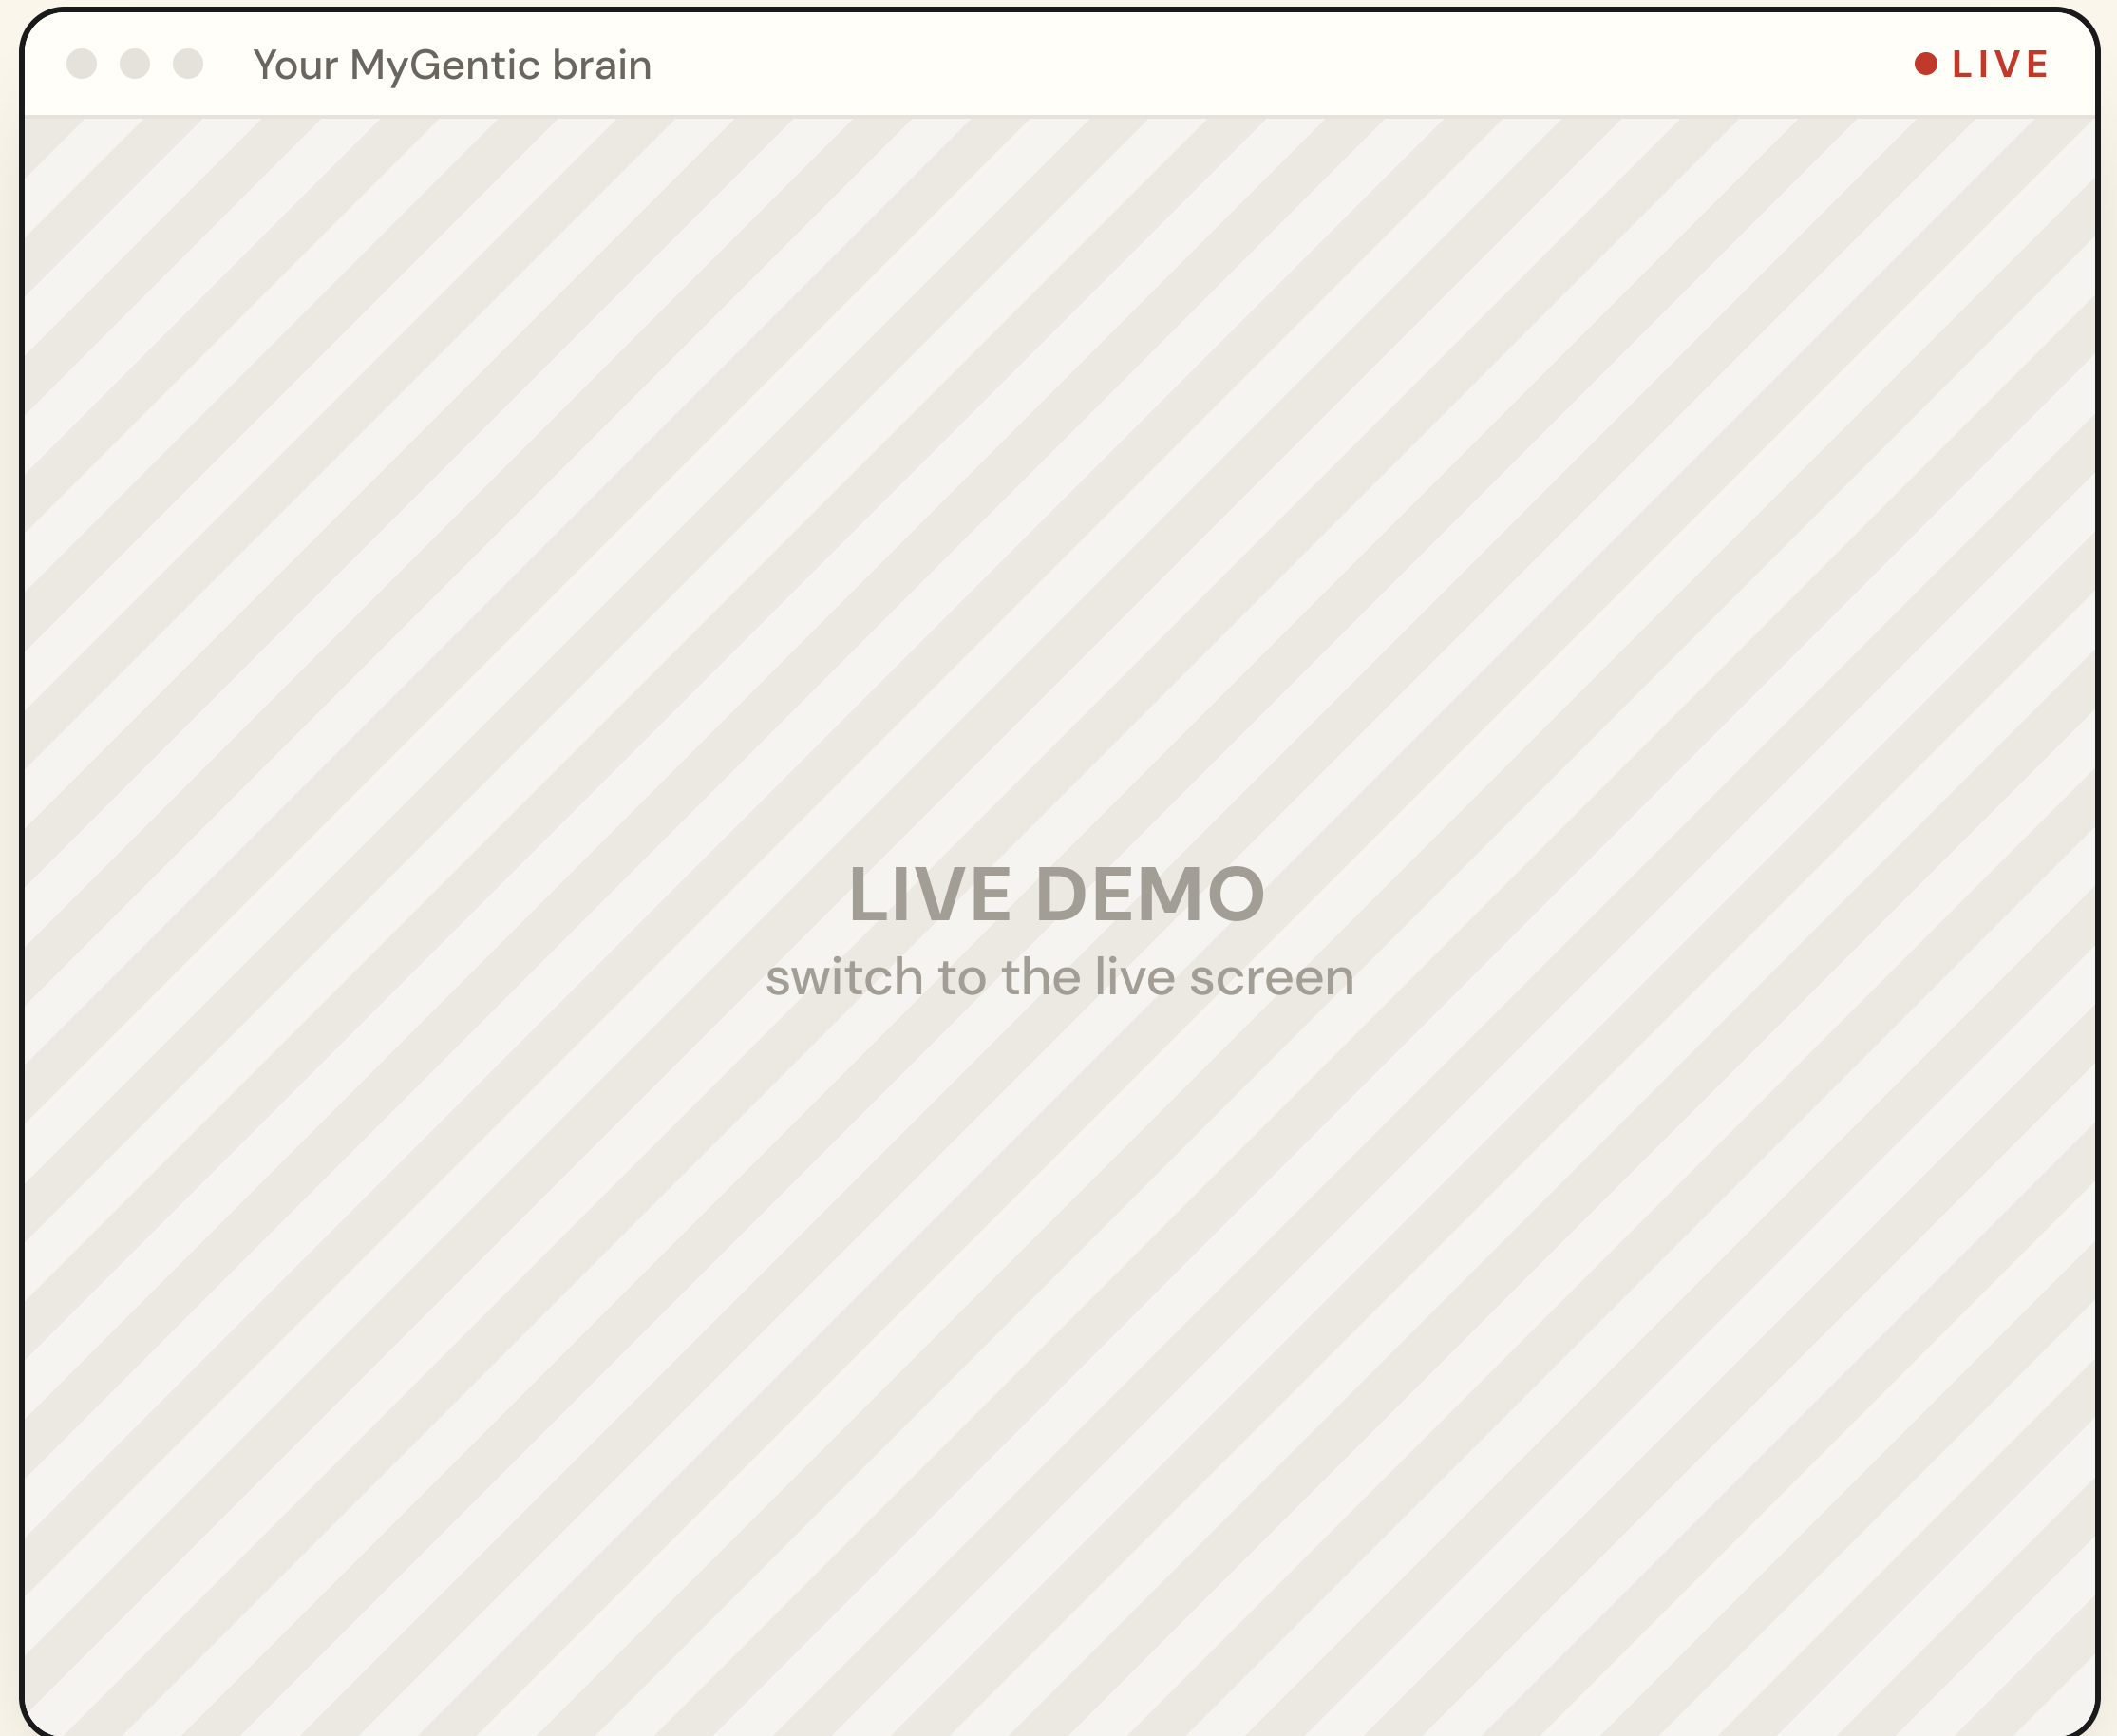

Who it's for

Then: “loaded ” in the chat

Teach it your voice.

Hey Brain, learn how I talk

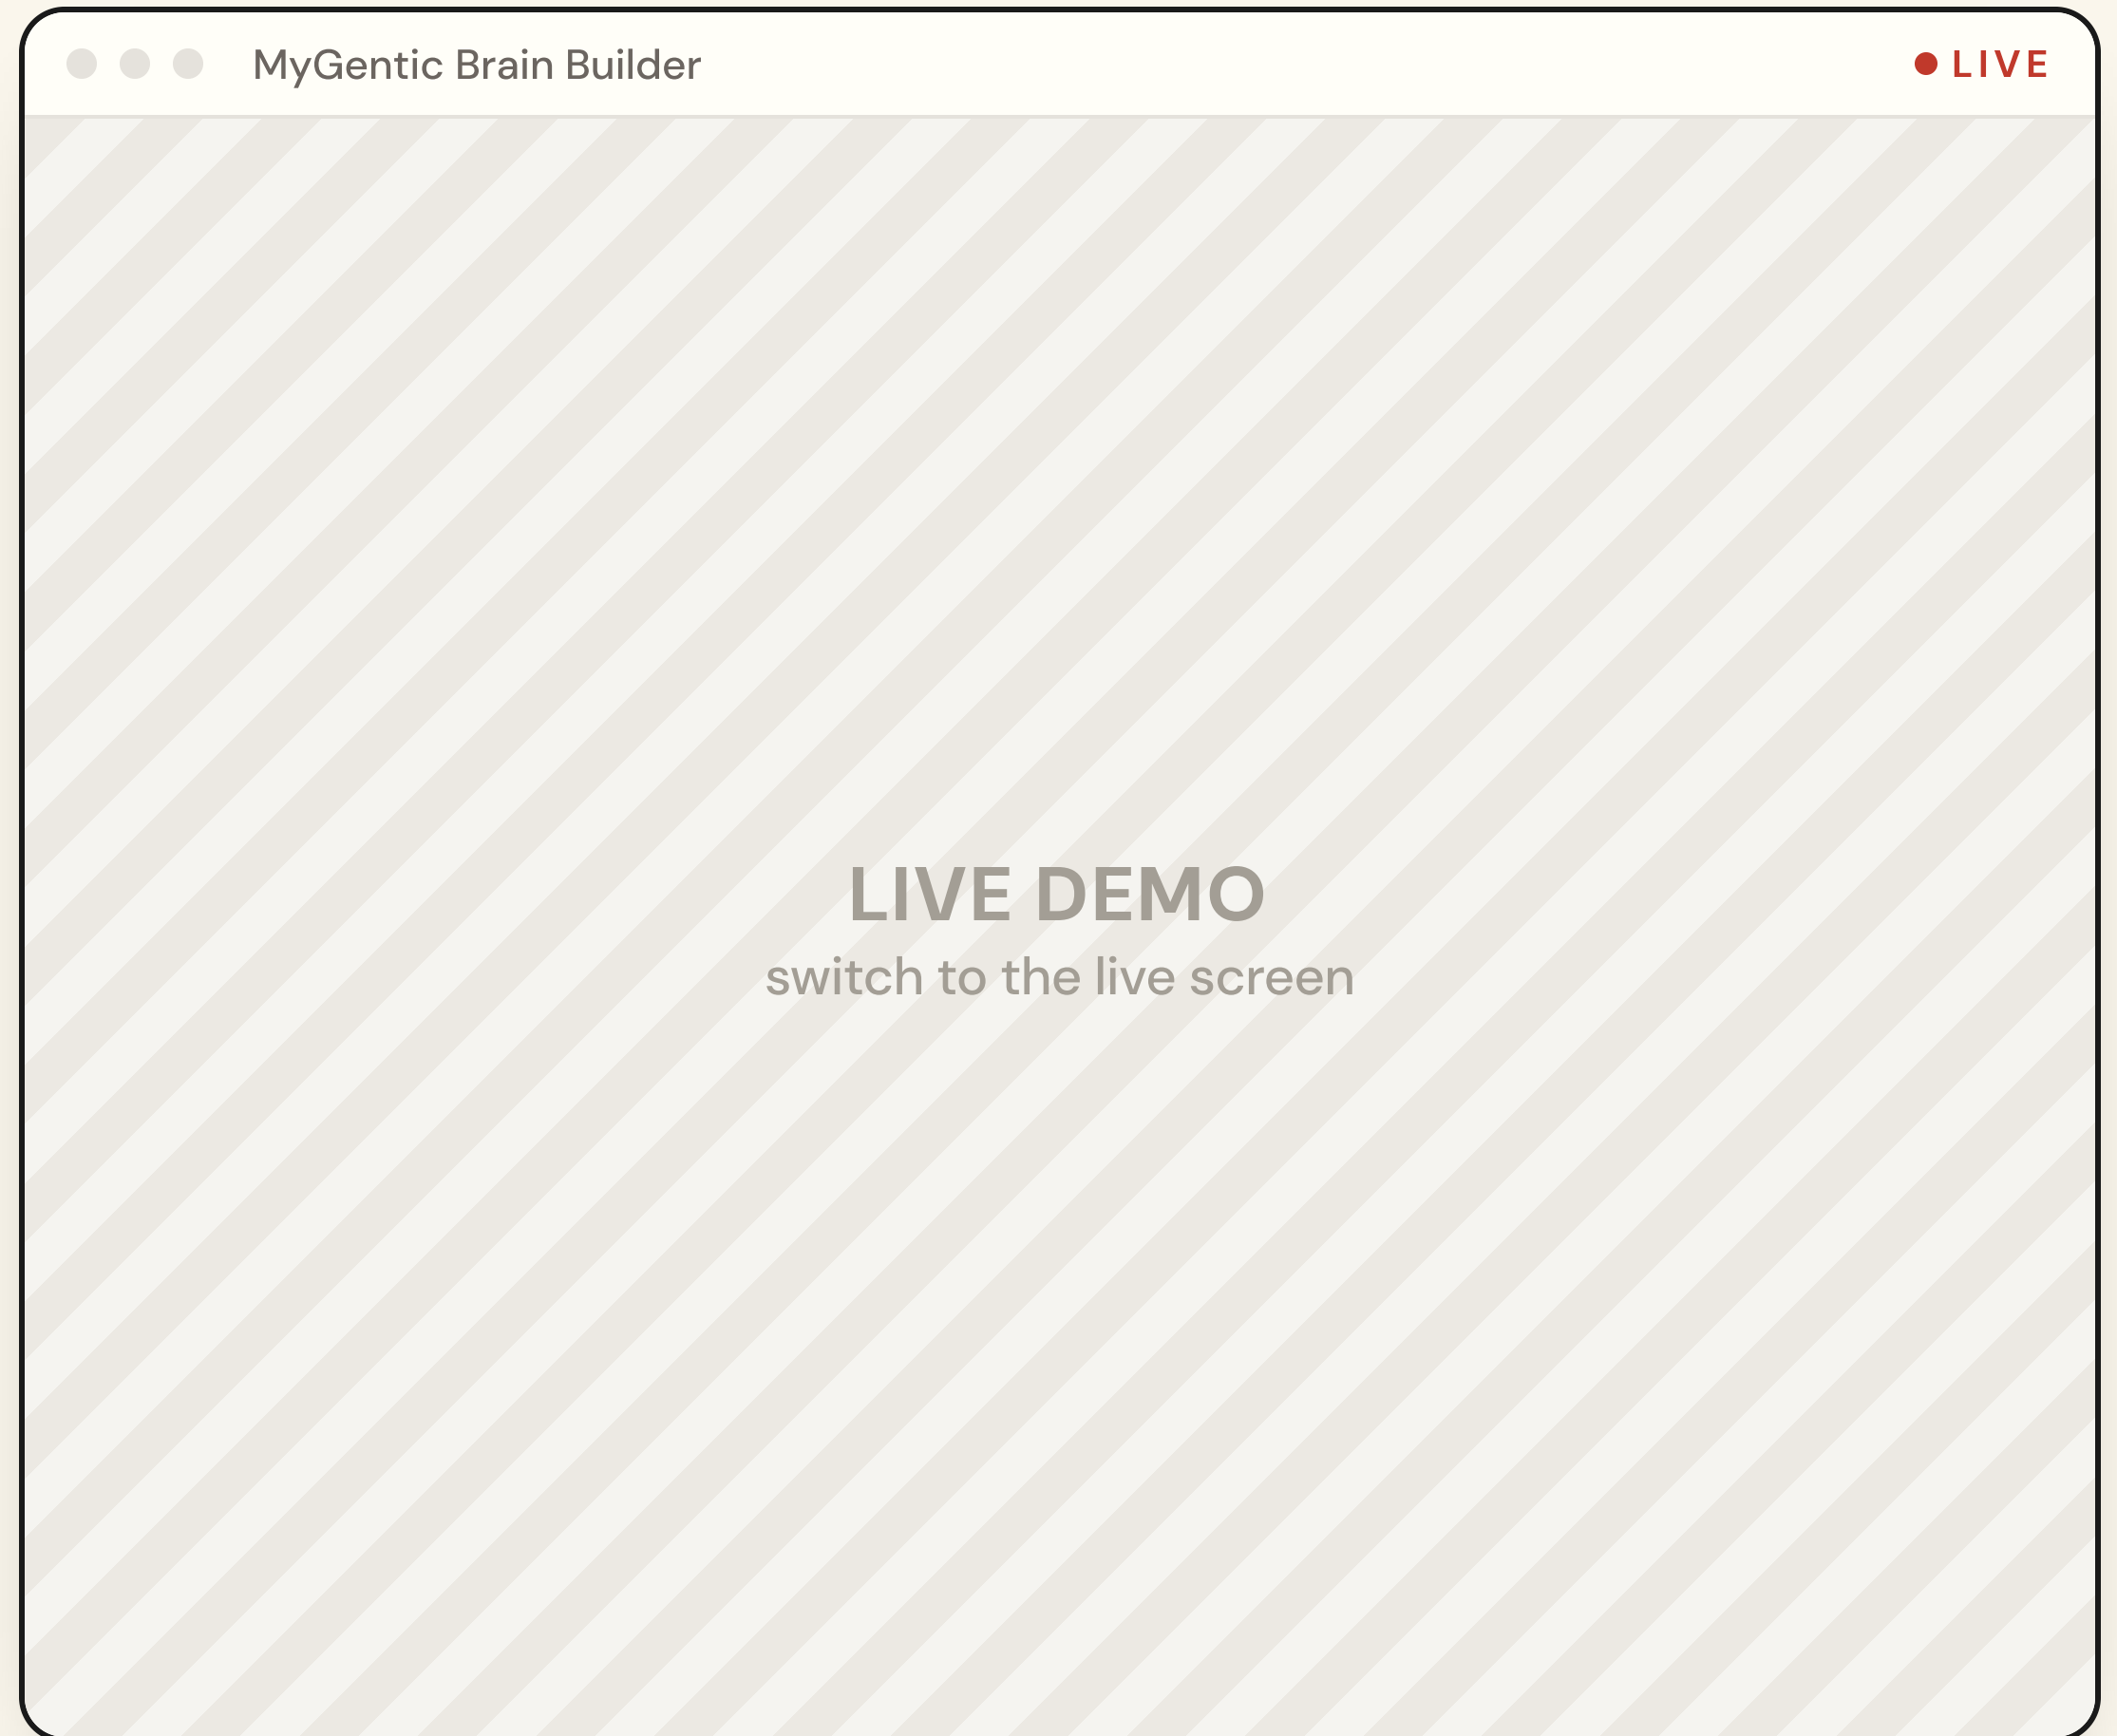

- 1 Paste three things you wrote
- 2 Voice notes
- 3 Sounds like you?

Set its rules.

Hey Brain, set my rules

- 1 Who it serves
- 2 What it never does
- 3 When it calls you

It knows when to call you.

Serves clients **without** you in the room.

Add your voice and rules.

Sounds like me

Never does

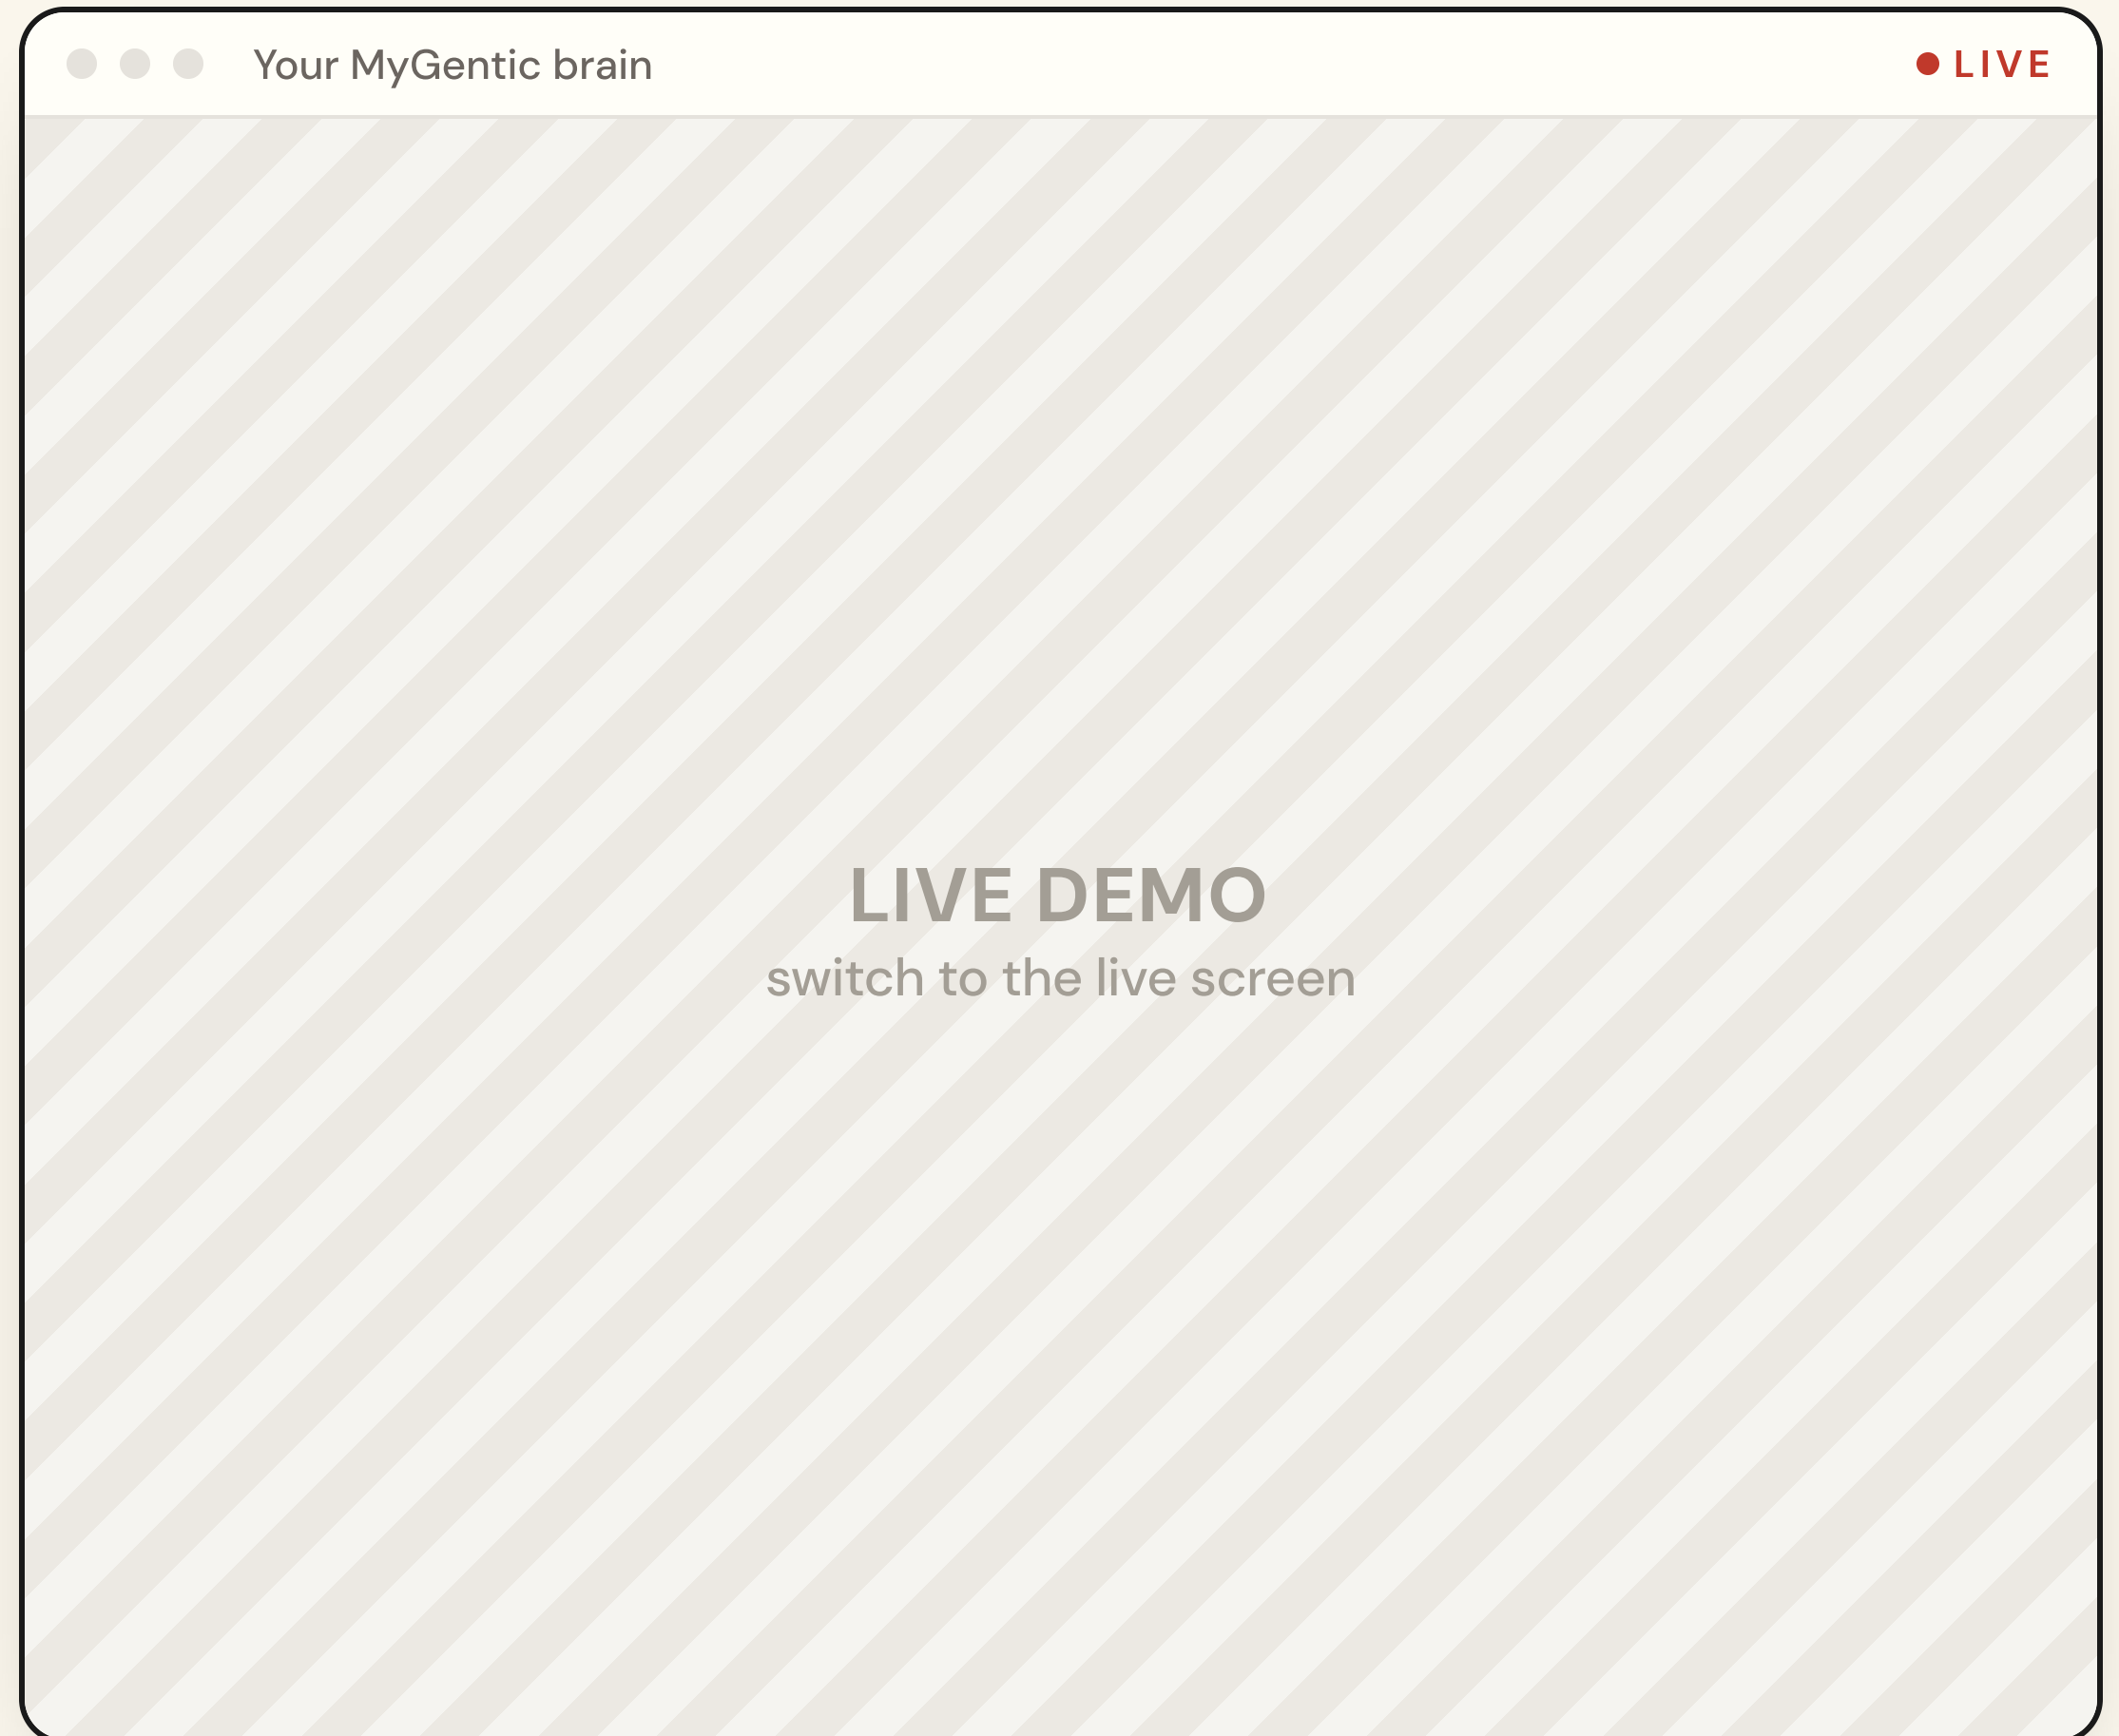

Calls me when

Then: paste both into your brain

Ask it a real question.

Hey Brain, answer as me:
[client question]

- 1 Real question, no names
- 2 Read it like a client
- 3 Note one fix

“Meet [tool name].”

Post its first answer in Circle · no client names

1 **Ask it five questions**

the ones you get every week

2 **Mark each answer**

right? sounds like me?

3 **Bring one client question**

names removed
